## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keith in view of Balson et al.

Keith discloses a computer-based method for use by a trader in an electronic trading system that includes at least one computer terminal connected over a network to at least one electronic exchange. Keith discloses multiple markets in an electronic trading system connected over a network to at least one electronic exchange (para 0004).

Keith does not disclose:

initiating a first order associated with a spread at a desired spread price in a synthetic spread market, wherein the synthetic spread market is associated with a first real market, and wherein the first real market is offered by at least one electronic exchange;

in response to initiating the first order, automatically sending a second order to an exchange-provided spread market, wherein the synthetic spread market and the exchange-provided spread market offer interchangeable tradable objects.

Balson et al discloses initiating a first order associated with a spread at a desired spread price in a synthetic spread market, wherein the synthetic spread market is associated with a first real market, and wherein the first real market is offered by at least one electronic exchange (fig 14). Balson et al also discloses in response to initiating the first order, automatically sending a second order to an exchange-provided spread market, wherein the synthetic spread market and the exchange-provided spread market offer interchangeable tradable objects (fig 2).

It would have been obvious to one with ordinary skill in the art to include initiating a first order associated with a spread at a desired spread price in a synthetic spread market, wherein the synthetic spread market is associated with a first real market, and wherein the first real market is offered by at least one electronic exchange because Keith teaches advantages to multiple markets (para 0004).

It would have been obvious to one with ordinary skill in the art to include in response to initiating the first order, automatically sending a second order to an exchange-provided spread market, wherein the synthetic spread market and the exchange-provided spread market offer interchangeable tradable objects because Keith teaches position risk (fig 2).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection. The previous final is hereby withdrawn.
